## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1-9 are allowed.

The following is an examiner's statement of reasons for allowance: Applicant states that Lindquist is inoperable to drive a plunger within a syringe loaded in the pressure jacket (Lindquist barrel 12). This is convincing because piston 162 has a diameter equal to the inside diameter of barrel 12. The piston 162 would not fit into the end of a loaded syringe because it is too large. Accordingly, the only way the Lindquist injector would operate with a syringe is if piston 162 were removed or if the diameter were decreased. This destroys the Lindquist device because caulk would leak out of the proximal end of barrel 12. The examiner also agrees that cradle 28 is not attached to a housing as claimed, but to barrel saddle 43. In addition, Lindquist handle 94 does not reasonably resemble a housing 21 having a front opening. Accordingly, the claims are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Contact Information***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sharon Kennedy whose telephone number is 571/272-4948. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Angela Sykes can be reached on 571/272-4955.
